

## **Interflon Fin Super (aerosol), Interflon Fin Grease (aerosol), Interflon Grease MP2/3, Interflon Metal Clean (Aerosol), Interflon Fin 25 Additive nl/fr**

### **Application**

Self-made sliding bearings (iron on iron) are lubricated.

Function of the machine: Electrical winch to pull boats out of the water and launch them.

Manufacturer: Self-made construction.

Model: modified in 2009.

Lubrication frequency: Previously a minimum of once a week / now once every two months.

Number of products: Previously, 1 can every 14 days / now just 1 can a year.

Company: Raimondi Giorgio jun. SA is a wharf with a long tradition. For two generations – since 1940 – the company has been active in the building, maintenance and storage of recreational vessels, rowing boats, outboard motors and boat engines from all manufacturers (BMW, Mercury, Volvo-Penta, Yamaha). Representative of Colombo, Larson, Lund, Sessa. The service provided includes the entire scale of building and repairs to wooden structures, polyester structures / launching (4 tonne crane) / winter storage (200 places) / washing and inspection facility / fuel station with two fuel pumps on the edge of the water.

For more information please look on [www.raimondi.ch](http://www.raimondi.ch)

### **Advantages**

The excellent rust-dissolving properties of Interflon Fin Super have produced positive results during various inspections, so no second inspection was needed (Fr. 60 / € 45 per inspection). Additives are being used this winter during engine overhauls of selected vessels belonging to customers and at the workshop boat.

### **Sector**

3732 Boatbuilding and repairing

### **Company name & address**

Raimondi Giorgio Jr. SA

Via Industria

CH-6826 Riva San Vitale, Switzerland

Tel. 0041 (91) 996 11 58

### **Problem**

If vessels need to be inspected a second time due to a Bowden cable (fire extinguishing system, emergency stop, steering) being stuck, this costs a lot of time and there are charges for the second inspection (Fr. 60 / € 45).

### **Environment**

Environmental protection regulations (protection of water quality near/in the lake) must be observed.

Water, cleaning agents, steam, oils and grease may not be disposed of in the lake.

### **Previous product**

Lybra – PTFE – rust dissolvant roestoplosser – cleaner – foam cleaner – tar grease – Motorex-grease.

**Solution** Interflon Fin Super (aerosol), Fin Grease (aerosol), Grease MP2/3 Metal Clean (Aerosol), Fin 25 Additive

### **Result**

Time and cost savings in all applications: boat building, engines, trailers, crane systems, motor vehicles, electrical systems and connections.

### **Cost saving**

They have built all the equipment themselves. This result has led to the company replacing all Lybra products (PTFE spray, cleaner, tar grease, graphite grease) with our Interflon products after all the previously used products had been used up.
