

Interflon reference nr.: EN04513 

Date: 12-08-2008

Confidential / For internal use only

Interflon Fin Clean All, Interflon Grease MP2/3

Application

Practical tip:

For cleaning rubber and aluminium boats, the firm

Boot-Service-Center

uses Fin Clean All. Fin Grease MP 2/3 is especially used for all bearing bushes, steering rods, shafts of the Suzuki outboard motors and the lubrication of propeller shafts.

For more information please look on www.bscenter.de

Advantages

After extensive testing, Fin Clean All is currently the only product used for internal and external cleaning of boats. Fin Grease MP 2/3 has a 2 to 3 times longer service life than the hitherto used graphite grease and further makes for a clean lubrication. Lubricants are no longer flung away, and there are fewer cases of shaft damage due to poor lubrication. The grease does not wash out from the plastic bushings of the steering gear. The re-lubrication interval for the propeller shafts and wing bolts has tripled with the use of Fin Grease MP 2/3.

Sector

- 5012 Motor Cars and other motor vehicles
- 5091 Sporting and recreation goods

Company name & address

Boot – Service - Center
Gottlieb – Wolfenstr. 49
73249 Wernau, Germany
Tel.: 07153 - 825030 Fax: 07153 - 8250310

Problem

After being used in fresh or salt water, plastic and aluminium boats show signs of lime deposits and other filth. The cleaning agents used till recently were highly corrosive. They ate into the paint and stickers of the boats and left white stripes on the bodywork of the aluminium boats. Most cleaning agents that were tested were not environmentally-friendly. Graphite grease was washed and flung out of the shafts and bearings of propellers. This necessitated frequent lubrication (short intervals).

Previous product

S100 cleaning agent, thinner, water and soap, graphite grease for maritime purposes.

Solution

- Interflon Fin Clean All
- Interflon Grease MP2/3

Result

Both after use and in the water, cleaning the boats is now effortless. Even at a strong dilution, Fin Clean All removes the most persistent filth without damaging stickers or paint. Fin Clean All can be both on the interior (leather upholstery) and the exterior.

Instructions for use

Fin Clean All is here used in a spray can at a 1:50 dilution ratio. Depending on the amount of filth, the product may need to be left to soak in for between 5 and 10 minutes. A 1:20 ratio is used for persistent filth such as lime residue.
