- 4449 Water transportation of freight
- 4492 Towing and tugboat service

Company name & address

Wagenborg Shipping
Marktstraat 10
9930 AA Delfzijl, Holland
Tel: +31 (0)598-636911

Problem

The cables are mostly covered in heavy Kuch grease, which results in dirt adhesion and makes visual inspection very difficult.

Environment

Seawater and extreme temperatures.

Previous product

Kuch grease.

Solution

- Interflon Lube EP

Result

Thanks to Fin Lube EP, the cables are dry and operate smoothly. Dirt no longer adheres to the cables and they withstand the aggressive environment very well.

Instructions for use

When replacing cables, make sure the new ones are 'dry'. Spray a thin layer of Fin Lube EP onto the cables 3 times with 5-minute intervals. Then dry with a cloth.
